Preface

It was a beautiful Sunday afternoon. We were twenty journalists from all over the world who had gone through a selection process in order to win a place for an intensive training with Reuters in London. On that day, as we were about to work on a news coverage, the door was suddenly thrust open. A dozen militants armed with machine guns violently rushed in. They shouted in a language we didn't understand and forced us to lie down. We were all shaken to the core when they pulled out blind folds and covered our eyes with them. In the darkness, we were led outside and into a truck that smelled like it had come straight from an abattoir.

It was the scariest training simulation I've ever had in my career. The coaches – very experienced war correspondents – put us through it so that we could experience what it would be like to be kidnapped. We kept analyzing the situation during the training, and through these discussions, I learned a few more lessons that had nothing to do with reporting in a war zone.

The first lesson came from a discussion in which an editor emotionally told me that the experience was very similar to living in Johannesburg. There, armed guards walked among pedestrians, and many houses look like fortresses. He then tried his hardest to kill my plan to go there. At that point, a British news anchor joined us and said: “We are journalists, not judges. Why do we have to *jump right into sensational differences*? Let's start with something we all share. Like, we all agree that French is not a real language.” Everyone laughed.

While I didn't always understand the mocking, teasing, and mildly xenophobic jokes in Europe, I immediately got the message when another reporter expressed her surprise when I revealed that I had never watched the classic kidnapping masterpiece *Fargo*. She looked at me with half a smile: “*Where have you been?*” The micro-aggression was so subtle I didn't realize it at first and felt ashamed. This was the second lesson I learned: The world clearly revolved around the US. A known movie in this part of the globe is supposed to be a universal phenomenon. A country on the other side of the water is a distant, faraway land. The eurocentrism was also deafening. My name was praised for being “normal” because it was written with the Latin alphabet.

On the last training day, we interviewed a series of people on ethnic conflicts. In the simulation, we had to go through a checkpoint where the guards asked people to identify her/his racial background. An Italian

colleague said: “White” and got into a row, because the guards blamed him for having dishonored his own race: “You look Arab. You are Arab. Point!” The message was clear: *Your biology defines your identity*. When it was my turn, I jokingly declared: “I’m Asian, but people call me ‘banana’ – yellow outside, white inside.” Not missing a beat, the woman behind me whispered in my ear: “I’m a reversed coconut! No worries.”

Soon after the training with Reuters, personal circumstances drove me away from journalism and onto the road of academia. I kept the nomad lifestyle, carrying with me the cultural baggage that revealed itself in the training as I moved across various borders. But the lessons I learned only took their shape during the time I taught intercultural management at the Amsterdam School of International Business (AMSIB).

As I delved deeper into the literature and conventional practices of the field, these lessons constantly popped up. They reminded me that even in a study that is meant to bring people together, differences are used as a warning, rather than a benefit. People are cautious of consequential conflicts, rather than seeing them as a promising synergy. Business students are told that if they don’t learn about culture, they will fail in the future because the others are so different from us. This cultural gap is “a nuisance at best and often a disaster.”¹ “The world is a more dangerously divided place today than it was at the end of the Cold War.”² Every time a book or a lesson was opened with a cultural blunder or mismatch, the words of my colleague in the training flashed on: “Why do we have to *jump right into sensational differences*? Let’s start with something we all share!”

This book is my attempt to put that remark into action. The journey to find similarities has taken me back to the subject of evolution, down to the biological level of genes and neurons, and opened me up to the newly emerging discipline of cultural neuroscience. The insight from neuroscience labs has excited many interculturalists with just two words: “brain plasticity.” It means our brain is like a muscle, as it can grow and adjust, and it enables us to represent multiple cultures. I can’t change my skin color, but with regard to the inside, to use the words of my dear friend Ida, I can be as white as a banana, or turn orange if I have to. Country of origin and biology need not to be the foundation of my identity. And thus, I’ve learned to introduce myself without carrying the cultural baggage that instantly invites stereotypes. Different contexts call for different values and practices. *Context is a dynamic force* that allows each one of us to be an active agent and problem solver, rather than a cultural dope. This is the spirit I want to share in this book.

In the writing process, I created a list of all the countries, main continents and gender pronouns. I carefully marked each time a place was mentioned

and each time a “he” or a “she” was used. The result was a colorful coded sheet that shows my failure to give equal weight to all countries and cultures, despite my deliberate attention. Nevertheless, I now understand the reason why literature in our field as well as in others is so US-centric. American narratives dominate the media and the academy. Take a look at the curriculum you are using and start coding the cases, arguments and theories. Even though you already have an idea, the result may still surprise you.

In sum, while this book is meant as an introduction to intercultural communication, it is also a novel attempt to incorporate the much-neglected dynamic paradigm of culture in the literature, the insight from other disciplines, and the representation of non-mainstream cultures.

To all of those who helped me finish this book, I extend my thanks. I am grateful to all the people I had the honor to befriend and meet on my journeys from the early days of my journalistic career, whose stories inspired me and became part and parcel of this book. To my colleagues and students who reviewed the manuscript, I owe you my thanks. I would like to thank my program manager John Sterk for giving me the much needed support to arrange my work so that this book could be finished on time. Finally, I thank the staff at AUP for their professionalism, and my research assistant Blerta Kola for her dedication.

1. The Survival of the Most Cultured

Objective

At the end of this chapter, you should be able to:

- Explain the nature of culture and its roles in the evolution of human species.
- Identify the role of cultural diversity.
- Discuss and illustrate with examples the dynamic interaction between culture and other factors: environment, genes, brain, and behaviors.
- Describe the process of globalization from evolutionary biology's perspective.
- Distinguish the unique characteristics of globalization in the modern era.

Chapter outline

1.1	The nature of culture	15
1.1.1	A Power Transition from Gene to Culture	15
1.1.1.1	Genes or Culture?	15
1.1.1.2	Culture as a Survival Strategy	16
1.1.2	How Did This Power Transition Happen?	17
1.2	Cultural diversity	18
1.2.1	The Interaction of Environment – Culture	19
1.2.1.1	Environmental Determinism	19
1.2.1.2	Environmental Possibilism	21
1.2.1.3	Cultural Ecology	22
1.2.2	Cultural Diversity as a Tool for Resource Management	23
1.3	Diversity pathways	25
1.3.1	The Interaction of Environment – Culture – Genes	25
1.3.2	The Interaction of Environment – Culture – Genes – Brain	28
1.3.2.1	Culture's Influences on the Brain	29
1.3.2.2	The Brain's Plasticity	30
1.3.2.3	The Sexist Brain?	32
1.3.3	The Interaction of Environment – Culture – Genes – Brain – Behavior	33
1.3.3.1	The Impact of Behavior on Genes	34
1.3.3.2	The Impact of Behavior on Culture	35
1.3.3.3	The Impact of Behavior on Environment	38
1.4	Globalization	39
1.4.1	Effective Resource Management	39
1.4.2	The Cooperative Nature of Humans	40
1.4.3	Reaching Out to Strangers	43
1.4.4	The Driving Forces for Cross-Cultural Communication	43

2. The Evolving Culture

Objective

At the end of this chapter, you should be able to:

- Explain the “tree of culture” and position diverse cultural elements in accordance with this metaphor.
- Explain the dynamics and stability of the different elements in the tree metaphor with appropriate examples.
- Describe the Inverted Pyramid model and position a cultural case in the correct layer and unit of analysis.
- Prove the significance of intercultural competence in doing business internationally.

Chapter outline

2.1 The metaphorical tree of culture	50
2.1.1 Fundamental Concern	51
2.1.2 Value	52
2.1.3 Outward Expression	52
2.2 The change in culture	53
2.2.1 Static vs. Dynamic Cultural Paradigm	53
2.2.1.1 Static Paradigm	53
2.2.1.2 Dynamic Paradigm	53
2.2.1.3 The Role of Context	55
2.2.2 The Dynamics of Values	56
2.2.2.1 Cultural Paradox	56
2.2.2.2 The Non-Binary Structure of Values	59
2.2.3 The Dynamics of Change and Stability	61
2.2.3.1 Different Speeds of Change	61
2.2.3.2 The Illusion of Change	62
2.3 The inverted pyramid model	66
2.3.1 The Universal Level	66
2.3.1.1 Differences as Starting Point	67
2.3.1.2 Similarities as Starting Point	69
2.3.2 The Collective Level	71
2.3.2.1 Culture at the Collective Level	71
2.3.2.2 Four Units of Analysis at the Collective Level	72
2.3.3 The Individual Level	75
2.3.4 Observing Culture from all Three Analysis Levels	76
2.4 Culture and international business	78
2.4.1 The Persistence of Diversity	79
2.4.2 Think Global – Plan Local – Act Individual	82

3. Stereotype – A Necessary Evil

Objective

At the end of this chapter, you should be able to:

- Explain the origin of stereotypes and prejudices from biology’s point of view.
- Explain the pitfall of stereotypes and prejudices with accurate examples.
- Given a specific case, recognize stereotypes, prejudices and explain the reasons.
- Given a specific case, propose alternative solutions.
- Describe strategies to live with stereotypes and reduce prejudices.

Chapter outline

3.1 Stereotype	88
3.1.1 The Origin of the Stereotype	89
3.1.1.1 A Survival Skill	89
3.1.1.2 A Social Mechanism	90
3.1.2 The Methodological Flaw in Stereotyping	91
3.1.2.1 Applying Collective Norms to Unique Individuals	92
3.1.2.2 Creating Incorrect Group Norms from Individual Information	93
3.1.3 The Pitfalls of Stereotyping	95
3.1.3.1 Stereotypes can be Stronger than Fact and Rationality	95
3.1.3.2 Stereotypes Exclude Those Who Don’t Fit	96
3.1.3.3 The Threat of Stereotypes and Self-Fulfilling Prophecies	97
3.1.3.4 Positive Stereotypes	98
3.2 Prejudice	100
3.2.1 The Origin of Prejudice	100
3.2.1.1 Group Categorization	100
3.2.1.2 Group Love	100
3.2.2 The Expression of Prejudice	102
3.2.2.1 Conflict of Resources	102
3.2.2.2 The Blame Game	103
3.2.2.3 Institutionalized Discrimination	105
3.2.2.4 Positive Discrimination	110
3.3 Strategies for living with stereotypes and reducing prejudices	111
3.3.1 Training Our Brain	112
3.3.1.1 Acknowledging Stereotypes	112
3.3.1.2 Training the Brain for Goals	112
3.3.2 Challenging Available Social Cues	115
3.3.2.1 Matching the Criteria for Cultural Fact	115
3.3.2.2 Checking Language and the Environment	117
3.3.2.3 Exposing Yourself to Counter-Stereotypes	118
3.3.2.4 Collecting Data	119
3.3.2.5 Creating a Vigilant Culture against Biases	120
3.3.2.6 Being on the Same Side	121

4. Non-Verbal Communication – How You Make Them Feel

Objective

At the end of this chapter, you should be able to:

- Explain the role of non-verbal communication and its root in biology.
- Describe the role of context in non-verbal communication at the universal, collective and individual level.
- Prove the significance of non-verbal cues in communication.
- Identify the limitation of non-verbal communication and its current theories.

Chapter outline

4.1	The role of non-verbal communication	124
4.1.1	The Universal Role of Non-verbal Communication	124
4.1.1.1	Primary Means of Communication	125
4.1.1.2	Indicator for Judgment	126
4.1.1.3	Creating Identity	128
4.1.2	Non-verbal Communication at the Collective Level	129
4.1.3	Non-verbal Communication at the Individual Level	130
4.2	The role of context in non-verbal communication	130
4.2.1	Context at the Universal Level	131
4.2.2	Context at the Collective Level	132
4.2.2.1	The Characteristics of High and Low Context Dependence	133
4.2.2.2	The (Dis)advantages of High and Low Context Dependence	135
4.2.2.3	When High Context Meets Low Context	137
4.2.3	Context at the Individual Level	139
4.3	Context in setting: time and space	140
4.3.1	The Language of Time Setting: Chronemics	140
4.3.1.1	Chronemics at the Universal Level	140
4.3.1.2	Chronemics at the Collective and Individual Level	141
4.3.2	The Language of Space Setting: Proxemics	147
4.3.2.1	Proxemics at the Universal Level	147
4.3.2.2	Proxemics at the Collective and Individual Level	150
4.4	Context from the body	155
4.4.1	Silence	155
4.4.2	Eye Contact	156
4.4.3	Touch	158
4.4.4	Body Movement (Kinesics)	160
4.5	The limitations of non-verbal communication	162
4.5.1	Ambiguity	163
4.5.2	Not Necessarily a Value Indicator	163
4.5.3	Static View of Change, Paradox and Individual Development	164

5. A Taxonomy Of Diversity

Objective

At the end of this chapter, you should be able to:

- Explain the evolutionary origin and the characteristics of Group Attachment, Hierarchy Acceptance, Gender Association, Uncertainty Avoidance and Time Orientation.
- Given a case or a phenomenon, identify related concerns and values.
- Given a case or a phenomenon, identify the possibilities of paradoxes, the impact of change and the non-binary nature of associated values.

Chapter outline

5.1	Group attachment	169
5.1.1	The Terms: Group Attachment, Individualism and Collectivism	169
5.1.2	Group Attachment in the Inverted Pyramid Model	170
5.1.2.1	Group Attachment at the Universal Level	170
5.1.2.2	Group Attachment at the Collective and Individual Level	171
5.1.3	Outward Expressions of Group Attachment	174
5.1.3.1	Harmony and Face	174
5.1.3.2	Interdependence and Trust	175
5.2	Hierarchy acceptance	179
5.2.1	The Term: Hierarchy Acceptance	179
5.2.2	Hierarchy Acceptance in the Inverted Pyramid Model	180
5.2.2.1	Hierarchy at the Universal Level	180
5.2.2.2	Hierarchy Acceptance at the Collective and Individual Level	181
5.2.3	Outward Expressions of Hierarchy Acceptance	186
5.2.3.1	Respect – Care	186
5.2.3.2	Loyalty – Protection	187
5.2.3.3	Obedience – Guidance	188
5.3	Gender association	189
5.3.1	The Terms: Gender Association, Masculinity and Femininity	189
5.3.2	Gender Association in the Inverted Pyramid Model	191
5.3.2.1	Gender Association at the Universal Level	191
5.3.2.2	Gender Association at the Collective and Individual Level	192
5.3.3	Outward Expressions of Gender Association	195
5.3.3.1	Gender's Role	195
5.3.3.2	Modesty and/or Assertiveness	195
5.3.3.3	Well-being and/or Competitiveness	196

5.4	Uncertainty avoidance	197
5.4.1	The Term: Uncertainty Avoidance	198
5.4.2	Uncertainty Avoidance in the Inverted Pyramid Model	198
5.4.2.1	Uncertainty Avoidance at the Universal Level	198
5.4.2.2	Uncertainty Avoidance at the Collective and Individual Level	199
5.4.3	Outward Expressions of Uncertainty Avoidance	202
5.4.3.1	Religion	202
5.4.3.2	Law	202
5.4.3.3	Technology	203
5.5	Time orientation	205
5.5.1	The Terms: Time Orientation and Chronemics	205
5.5.2	Time Orientation in the Inverted Pyramid Model	206
5.5.2.1	Time Orientation at the Universal Level	206
5.5.2.2	Time Orientation at the Collective and Individual Level	206
5.5.3	Outward Expressions of Time Orientation	209
5.5.3.1	Past-orientation	209
5.5.3.2	Present-orientation	211
5.5.3.3	Future-orientation	211

6. Intercultural Competence – Creating Yourself

Objective

At the end of this chapter, you should be able to:

- Explain why the most cultured individuals are more likely to be the most successful individuals.
- Describe different stages of acculturation according to the Developmental Model of Intercultural Sensitivity (DMIS).
- Describe the requirements of Cultural Intelligence (CQ).
- Given a specific case, recognize stages or components of DMIS and CQ.
- Describe Cultural Shock and its consequences.
- Describe the potential of developing CQ based on the notion of a malleable, evolving, cultivated self.

Chapter outline

6.1 Seeking similarity	217
6.1.1 A Signal of Trust	217
6.1.2 Ethnocentrism	218
6.1.3 Dealing with Differences	220
6.2 Acculturation	221
6.2.1 The Developmental Model of Intercultural Sensitivity (DMIS)	221
6.2.1.1 Denial	221
6.2.1.2 Defense	223
6.2.1.3 Minimization	224
6.2.1.4 Acceptance	226
6.2.1.5 Adaptation	227
6.2.1.6 Integration	228
6.2.2 Where Are You at DMIS?	229
6.2.3 Cultural Shock	231
6.2.3.1 What Does Cultural Shock Look Like?	231
6.2.3.2 The Consequences of Cultural Shock	232
6.2.3.3 Stages of Cultural Shock	233
6.2.3.4 Reversed, Re-entry Cultural Shock	234
6.3 Intercultural competence	235
6.3.1 Cultural Intelligence	236
6.3.1.1 CQ Head – Metacognitive/ Cognitive	237
6.3.1.2 CQ Heart – Motivational	238
6.3.1.3 CQ Hand – Behavioral	238
6.3.2 The Self, or the Lack Thereof	240
6.3.2.1 The Self-fulfilling Prophecy of the Self	241
6.3.2.2 The Malleable Evolving Self	241
6.3.2.3 The Cultivated Self	242
