ATLANTIS STUDIES IN COMPUTATIONAL FINANCE AND FINANCIAL ENGINEERING

This book series aims at expanding our knowledge of statistical methods, mathematical tools, engineering methodologies and algorithms applied to finance. It covers topics such as time series analysis, models of financial assets and forecasting, algorithmic trading, high-frequency trading, portfolio optimization, risk management, machine learning and data analysis in financial applications.

Risk Quantification and Allocation Methods for Practitioners

Risk Quantification and Allocation Methods for Practitioners offers a practical approach to risk management in the financial industry. This in-depth study provides quantitative tools to better describe qualitative issues, as well as clear explanations of how to transform recent theoretical developments into computational practice, and key tools for dealing with the issues of risk measurement and capital allocation.

Jaume Belles-Sampera is assistant professor in the Department of Econometrics, Statistics, and Applied Economics at the University of Barcelona, where **Montserrat Guillén** is professor in the same department and **Miguel Santolino** is associate professor.

ATLANTIS ADVANCES IN NANOTECHNOLOGY, MATERIAL SCIENCE AND ENERGY TECHNOLOGIES

The aim of this series is to publish high quality manuscripts, giving an up-to-date and clear presentation at different levels of understanding, ranging from general interest to specialist research monographs in the three following fields:
Nanotechnology, Material science and Energy technology.

Joseph B. Natowitz and Christian Ngô

Our Nanotechnology Future

This book explores nanotechnology, a rapidly evolving and growing field with applications in a large number of areas. The concepts and physics are highlighted through topics such as nanoscience, quantum effects, nanostructures, and new forms of carbon. Applications and potential health and safety implications of nanomaterials are discussed for healthcare, food production, electronics, defence and more. Accessible and timely, this introduction to nanotechnology will interest students, teachers, politicians, and everyone else eager to learn more about this dynamic field.

Joseph B. Natowitz is the former holder of the Bright Chair in Nuclear Science at Texas A&M University.

Christian Ngô is the founder of the consulting company Edmonium Conseil and the author of many books. Together, they are the authors of *Our Energy Future: Resources, Alternatives, and the Environment*.
